

using the established line to assist alignment of the guide;

applying adhesive to the surface to be tiled;

aligning one or more tiles along the guide;

tiling the remainder of the surface; and

5           applying grout to fill in the space between the tiles and obscure the guide from view.

18.   A method of tiling according to Claim 17 characterised in that, the tile is aligned by abutment against an outwardly extending ridge located on the tiling guide.

10       19.   A method of tiling according to either of Claims 17 or 18 characterised in that, a second tiling guide is secured at an angle, adjacent the tiling guide to enable two edges of a tile to be aligned.

20.   A pack of tiles incorporating a tiling guide (1) of the type defined in Claim 1.
